✓ TO-DO LIST

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. A vertical margin line is present on the left side, creating a narrow left margin. There are no markings or text on the page.

Figure 1 consists of nine scatter plots arranged in a 3x3 grid. The rows represent different countries: USA (top row), Canada (middle row), and UK (bottom row). The columns represent different years: 1990 (left column), 1995 (middle column), and 2000 (right column). Each plot shows the relationship between the number of children in the household (x-axis) and the number of children in the family (y-axis). The x-axis ranges from 0 to 10, and the y-axis ranges from 0 to 10. The plots show a positive correlation, with the number of children in the family generally increasing as the number of children in the household increases. The USA plots show the highest values, followed by Canada, and then the UK. The 1990 plots show the highest values, followed by 1995, and then 2000.
